-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on 18 May 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.84(h)(5) because Figure 2 submitted 6/17/05 and original figure 2 show(s) modified forms of construction in the same view. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3683

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Lavelly (342) of record.

Re: claim 18. Fig. 1 of Lavelly discloses a brake slack adjuster with worm gear 18, actuator 28, actuator rod 40 with pins 42,44 in the slots or holes at the ends of the rod 40. The actuator rod 40 is disposed within an aperture 32 of the actuator. Lavelly particularly includes an actuator rod 40 having an end (bottom end) disposed within the aperture 32, the end including a slot surrounding element 42 the longitudinal diameter of which extending in a direction generally parallel with the axis (of the worm) and defining the non-adjustment and adjustment positions, and a pin slidably disposed within the slot in a direction perpendicular to the axis of the worm, as broadly claimed, and movable within the slot in the direction between the non-adjustment and adjustment positions, the pin secured to the actuator (the pin, within the slot, is movable longitudinally due to the longitudinal movement of the actuator rod, as broadly recited).

Re: claim 20. Lavelly shows the limitation wherein the pin is seated in one end of the slot in the non-adjustment position and in an opposing end of the slot in the adjustment position. This condition, as broadly recited, is achieved by Lavelly since the top part of the pin is seated in one end of the slot and the bottom part of the pin is seated in an opposing end of the slot in both the non-adjustment and adjustment positions.

Allowable Subject Matter

4. Claims 1-17 and 19 allowed.

Response to Arguments

5. Applicant's arguments filed 5/18/05 have been fully considered but they are not persuasive. Lately reads on the limitations as amended in claim 18 and as recited in new claim 20 as set forth above. Accordingly, the rejections have been maintained.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
